CoinDepo - CDS 400 series

SELF-SERVICE COIN COUNTERS

Specifically designed for your retail business

MAXIMIZE BUSINESS PROFIT

MAXIMIZE CUSTOMER SATISFACTION

MINIMAL SPACE REQUIREMENT

NEW BUSINESS OPPORTUNITY!

CTcoin™

CoinDepo - 400 series
DESIGNED FOR THE RETAIL BUSINESS

Say hello to your new money-maker!

Your customers hold more coins than ever before, in jars, drawers and piggy banks. With CTcoins' CoinDepo - 400 series, you can offer your customers a needed exchange service, while at the same time taking advantage of a unique business opportunity and benefiting from the amount of deposits in your shop.

In addition to increased revenues, you can save on Cash In Transit and coin costs, because the coins in your CoinDepo 400 can then be incorporated into your cash flow.

The CoinDepo 400 series is specifically designed for the needs and demands of retail businesses. The small footprint allows for a visible and central location in any shop layout, which promotes customer usage and thus encourages more coin deposits.

The CoinDepo 400 series comes in different versions and offers:

CoinDepo 401	Mix coin counting and depositing: Mixed coins in bag/container.
CoinDepo 424	Mix coin counting and depositing: Mixed coins in up to 4 consecutive bags.
CoinDepo 405	Mix coin counting and sorting of up to 5 different denominations.
Options	2 doors, multi bagging, vault/strong box, operator coinbox with additional fee acceptance button, communication module and much more.

DID YOU KNOW?

The average customer who deposits coins spends approx. 3 minutes at the self-service coin machine. This is valuable time that can be used for marketing and brand building purposes. More than 90% of the deposited amounts will be used in your shop.

CoinDepo - 400 series

A PROFITABLE SERVICE FOR YOU AND YOUR CUSTOMERS

The CoinDepo - 400 series is a Scandinavian designed, automatic and user-friendly self-service coin deposit machine that makes it easy for your customers to exchange coins and generate value for both you and them. They benefit by converting idle coins that are sitting in dusty piggy banks and jars into products bought in your store. The self-service coin deposit machines have been developed and constructed precisely for a hectic retail environment by applying years of experience and using the well-proven technology of CTcoin.

Your customers are guided through the depository process by easy-to-follow pictograms. When the deposit and count is completed, the customer receives a secured receipt with a detailed view of counted coins and total value. The receipt is then used as a means of payment for the groceries bought in the shop. The receipt is equipped with a barcode for making easy payment at the checkout counter.

If the customer does not buy groceries but requires cash-back, you may choose to put a fee on the deposited amount for payout or add a fee to each coin deposit transaction.

- Aesthetic, user-friendly and vandal-proof design
- Rejection of foreign and counterfeit coins
- Guaranteed spending of deposited amount within the store
- Incorporation of coins into the business – thus saving costs on coinage
- Low-cost - short payback period
- Compact design, making it easy to place at the point of greatest customer flow
- Sorting or non-sorting (non-sorting either in CIT container or up to 4 consecutive bags)
- Manual coin feeding
- Multibagging i.e. collect the same denomination in up to 3 different bags
- 3 point safety lock. Door, which separates the coin module from the money compartment
- Active sorting of up to 2 denominations
- Barcode on customer and bag receipts
- Optional Communication Module (XML transaction, event and verification data via USB/LAN)
- 2-year warranty and local technical support
- Cashier number, comprehensive fee system, dual language capabilities
- High quality printer with auto cutter

The CoinDepo - 400 series is robust and designed to withstand vandalism and theft attempts.

The CoinDepo - 400 series can be delivered with a communication module which sends transaction and event data in xml format for further processing.

Large waste tray for dirt, debris etc.
